

SCZ Disk & Tape Controllers Work in Most Eclipse Channels

Our Test Engineers have finished testing Zetaco SCZ Controllers in most Eclipse chassis -- all except the MV/30000 and the MV/40000HA. While SCZ Controllers are compatible with all Data General CPU's tested, we cannot, as yet, verify their compatibility with these two.

The Zetaco products verified so far for operation in Data General's Eclipse Channel include:

SCZ-5 Disk/Tape Controller	SKM Disk/Tape Subsystems
SCZ-3.2 Disk Controller	SKS-HP Disk Subsystems & SKR-600 Optical Disk Subsystem
SCZ-4 Tape Controller	SKT-1300 & SKT-2300 Tape Subsystems

Our problem is lack of machine for testing. If you have tested Zetaco SCZ products in either the MV/30000 or the MV/40000HA, or can help us gain access to them for testing purposes, please let us know ASAP! Call Gary Becker or John Fahlstrom at 1-800-423-3020. Thank you!
