**The Special Release dgux\_sr.940217 delivers software patch kits and individual patches for four DG/UX releases which are intended to protect your system from improper program execution or data corruption. Please install the Special Release immediately.**

You are receiving this Special Release via one of two distribution methods: direct shipment to customers with support contracts, or directly from manufacturing to customers with new DG/UX AViiON orders. If you are receiving this release via a direct shipment from manufacturing and DG/UX is pre-loaded on your system disks, then the Special Release has already been installed and need not be reinstalled.

For DG/UX 5.4 Release 3.00 systems you may verify that the Special Release has been installed by issuing the command `admpackage -o list`. If the package name `dgux_5.4R3.00.p09` is returned, then the Special Release has been installed.

For DG/UX 5.4 Release 2.10 systems you may verify that the Special Release has been installed by issuing the command `admpackage -o list`. If the packages: `dgux_5.4R2.10.31` and `dgux_5.4R2.10.p35` are returned then the Special Release has been installed.

If you are receiving this release via support contract channels you are to proceed with the installation of the Special Release. Refer to the Special Release Notice for AViiON Systems Special Release dgux\_sr.940217 (017-600059-00) for loading instructions for your specific release of DG/UX. The op-sys-x patch kit notices are included with the Special Release to document their content. Do not use the installation instructions contained therein.
