News For The Employees of Data General

April 15, 1983

Data General Celebrates 15th Birthday

Data General founders Fred Adler, Herb Richman and Ed de Castro are all smiles during a surprise Data General birthday party at the recent Million Dollar Club.

The birthdate of a company is a bit more difficult to pinpoint than the birthdays of people. Was it the moment someone said "let's do it?" Was it when the first product came off of the drawing board? Or, perhaps, when the first customer signed on the dotted line?

The birth of a company is probably different in the mind of each individual involved in the founding. But everyone - even a company - needs a birthday so incorporation is pinpointed as the birthdate of Data General - April 15, 1968.

Data General was founded by Ed de Castro, Herb Richman, Fred Adler, Richard Sogge and Henry Burkhardt. Ed, Herb and Fred remain active in the business as directors as well as president, executive vice president and corporate secretary, respectively.

Today, Data General celebrates 15 years of growth. From a literal handful of people with a few good ideas, the company has grown to nearly 15,000 people who have delivered over 125,000 computer systems and are currently responsible for more than \$800 million in annual revenues.

Free coffee and cake in cafeterias throughout the company is one small way of asking every employee to join in the birthday celebration.

Happy 15th To Data General!

Dave Chapman

Lee Henning

Howard Haythornthwaite

Chapman Named Senior Vice President; Henning And Haythornthwaite Promoted

Data General has announced the election of Dave Chapman to senior vice president, Manufacturing, and the promotion of Lee Henning and Howard Haythornthwaite to vice presidents. Lee is vice president of Materials and Manufacturing Services,

and Howard is vice president of International Manufacturing Operations. Both report to Dave.

Dave, who reports to President Ed de Castro, has been Manufacturing vice president since 1981. Prior to that he was vice president of U. S. Manufacturing Operations. Dave came to Data General after 21 years at IBM. He holds an MBA and received a master's degree in management science and operations research as a Sloan Fellow at M. I. T.

Lee is responsible for Customer Order Administration, Materials/Distribution, Manufacturing Services, and Manufacturing and Sales MIS. He has been director of Materials and Manufacturing Services since coming to Data General in 1981. He joined the company after 23 years at IBM. Lee holds a BA in business administration from Winona State College.

As vice president of International Manufacturing Operations, Howard oversees Data General's Far East Manufacturing plants; the International Purchasing Operations; and the development and implementation of future international manufacturing operations. Howard came to Data General a year ago as general manager of International Manufacturing Operations. Prior to that, he was with IBM in Europe and Asia for 15 years. Howard holds a bachelor's in technology degree from Loughborough University in England, and a master's degree in operational research from the University of Birmingham in England.

Sales Team Expanding Referral Bonuses Offered

An expansion of the North American Sales and Systems team has opened up a number of experienced Sales representative positions as well as 40 sales MST (Marketing Systems Trainee) and 20 Systems Engineering MST positions for which candidates are being sought now.

"For the Sales positions, we are looking for experienced computer sales representatives to fill openings nationwide," explains Eric Giskes, director of Field Sales and Systems Personnel. "These openings are in commercial, technical and federal sales areas."

Bonus

To encourage employees to refer people for these positions, a special Bonus Referral Program is in effect from now through the end of the third fiscal quarter - June 4, 1983. Employees referring experienced computer sales people will be eligible for a \$1,000 bonus for the first successful referral and \$2,000 for each subsequent successful referral.

A referral can be either a detailed resume from the potential employee or a completed Data General application. Employees referring someone should complete a REFERRAL PROGRAM CARD to assure

proper recording of the referral. Field personnel may make referrals by TWX but should include their name, badge number, title and office address.

Bonuses will be calculated only for referrals made between April 15 and June 4, 1983. Prior successful referrals are not counted in determining first or second referrals under this program. To be paid a bonus, you must refer the person between now and June 4; and the person must be interviewed within 30 days of the end of the program, hired and be on the payroll for at least 60 days. Complete referral program rules are available from your Personnel representative.

MST

As far as the MST positions are concerned, recent college graduates with bachelor's or master's degrees are being sought. Their educational background should be technical or marketing/business with a substantial amount of technical coursework.

MST positions are initial opportunities for people to enter the world of computer sales and systems. There are no bonuses offered to you for referring MST candidates, but it is an opportunity for you to help someone begin a career.

Referrals under the bonus program or for the MST program should be submitted directly to Eric Giskes at MS A237 in Westboro or the following Area Sales/Systems Personnel managers:

Jackie Watson, Manhattan Beach, California
Kevin Balog, Arlington Heights, Illinois
Rich Novak, Melville, New York
Rich Delnero, Norcross, Georgia

Developers Honored For Achievements

Data General programmers, technical writers and editors who contributed to CEO - the Comprehensive Electronic Office, and PRESENT software were presented with Outstanding Development Achievement Awards last Saturday.

Cited for their contributions were:

Elizabeth Babcock	Madhav Mutalik
Pete Bixby	Pam Norton
David Boothby	Ken Remillard
Adele Burrows	Karen Richards
Jane Carmody	Jonathan Roses
Anne Dolce	Tom Rothschild
Richard duFosse'	Eric Seale
Chris Ebacher	Bill Shelley
Tom Ferullo	Kim Shenton
Elizabeth Roll Fox	Brooke Sullivan
Winifred Gay	Ray West Jr.

During the awards banquet, held at Fanueil Hall in Boston, President Ed de Castro applauded the

employees for their accomplishments and said, "I am happy to be here so I can congratulate you for your work on two very important products to Data General, CEO and PRESENT. Their quality and acceptance in a highly competitive market has added to Data General's stature in the industry."

Programmer Bill Shelley (left) receives his award from Steve Weingart, director of Office Automation Systems Development.

Information Systems Division (ISD) Vice President Dave Lyons said, "I'd like to express my own appreciation for your efforts and my understanding of the personal sacrifices you made and challenges you faced in bringing CEO and PRESENT products from concept in the summer of '80 to the heart of the industry's leading integrated office systems in the spring of '83."

CEO and PRESENT were introduced in November 1981. CEO is Data General's office automation product. PRESENT software is a user productivity aid that combines a large number of functions into one easy-to-use product.

Programmer Kim Shenton (left) and her husband, Steve, attend the awards banquet.

This was the fourth time Outstanding Development Achievement Awards have been presented. The award was initiated in 1980 when developers of the NOVA 4 computer were cited. Since then, ECHO disc drive, microNOVA MP/100, MP/200, MP/OS,

XODIAC and ECLIPSE MV/8000 computer hardware and software developers have been recognized for their contributions.

The award is presented to employees who contribute to a product which is successful in its market, provides Data General with a technological advantage and places the company in a new market.

Ernest Hantavis Named Field Engineering Controller

Ernest Hantavis has joined Data General as Field Engineering controller, responsible for all Field Engineering financial functions. Ernie will be based at Milford and report to John Gardner, controller Business and Field Divisions.

Prior to coming to Data General, Ernie was with the Modicon Division of Gould, where he was a Field Engineering manager. Before that, he was with Honeywell Information Systems for 11 years where he held a number of financial management positions, including Material Control manager, Equipment Control manager, Marketing Administration manager and Finance and Administration manager for the minicomputer and terminal Field Engineering operations.

Ernie has a bachelor's degree from Bentley College.

Ernie Hantavis

Dave Crocker

Dave Crocker has been promoted to assistant Field Engineering controller, reporting to Ernie. In this new position, Dave will provide financial support to North American Field Engineering.

Reporting to Dave are the Area controllers, Field Engineering Internal Audit, Cost Accounting and a Financial Planning and Analysis team.

Dave had been acting Field Engineering controller for the past six months, as well as manager of Accounting Operations. He joined Data General's Corporate Accounting group in 1976 and moved to Field Engineering in 1980.

Dave has a BS from Boston College and an MBA from Suffolk University.

Finance Director Named For Nippon•Data General

Mikihiko Takahara has been appointed Finance director for Nippon•Data General, reporting to Nippon•Data General President Hisashi Tomino.

Mikihiko is responsible for directing the financial activities of Nippon•Data General and for providing support and counsel to Hisashi Tomino. As an employee of the Finance group, Mikihiko will report through John Gardner, controller, Business and Field Divisions, who is located in Westboro.

Mikihiko comes to Nippon•Data General after 16 years with Esso where he held a number of financial positions. He holds an MBA from Northwestern University and a law degree from Tokyo University.

Continuing Products Division Formed

Data General has announced the Continuing Products Division, a new organization within Customer Services to market used, demonstration, surplus systems and related equipment.

"This new organization offers a range of systems and equipment at attractive prices and delivery," says Michael Schneider, vice president of Customer Services. "It will enable Data General to offer used and surplus systems and products to those customers who need them."

While most of the equipment is from Data General demonstration centers and other in-house applications, offerings from the new division will also include equipment which has become surplus due to the introduction of new products.

"As the original manufacturer of these products, we are in the best position to evaluate and prepare them for resale," says Howard Berg, Marketing manager for Continuing Products. "Further, these products carry a Data General warranty and are eligible for Data General maintenance contracts."

Continuing Products' offerings will be sold directly through Data General Sales. Maintenance is available through Field Engineering.

Westboro

People

J. Peter Doonan has been named MIS manager for Manufacturing Indirect Productivity Systems reporting to MIS Director Richard Gottlieb.

Pete has been with Data General since February 1978. During that time he held various Manufacturing MIS positions in Southboro including plant section manager.

Pete has a BS in business administration from Holy Cross and an MBA from Clark University.

Don Dubrule joins Data General as MIS section manager for Manufacturing MIS - Systems Development.

Don will be responsible for various inventory control/planning systems, including both development and support aspects of these systems.

Don has a bachelor's degree in accounting and a master's degree in business administration from Clark University.

Joining Manufacturing MIS - Systems Development as an applications programmer/analyst is *Alan Krentzel*.

Alan has an undergraduate degree from Boston University, an MBA from Babson College and has attended the London School of Economics.

Don and Alan report to Manager Paul Pierce.

Employee Telephone Codes To Change In Westboro

New telephone authorization codes will be issued through the mail to employees in Westboro. If you have not received a new six-digit authorization code by April 21 for placing outgoing phone calls contact Marsha Dibbern (x6057) or Charlie Hurlburt (x6085) for assistance. New codes go into effect on Sunday, April 26.

Fire Alarms will be tested in Buildings 14A and 14B on Sunday, April 17 from 8 a.m. to 11 a.m. Alarms will sound during that time.

Southboro

Metal Fab Training Enhances Productivity

In a cooperative effort to improve quality and efficiency, Southboro's Metal Fabrication department has been providing a training program for machine operators and supervisors. Tony Marrazzo has coordinated this project by bringing

representatives from various Metal Fabrication equipment suppliers into Southboro.

Tony explains that the companies which Data General has selected to purchase equipment from have some very good training packages that are available on request. He states, "Our vendors have been extremely responsive to our needs. A joint effort like this enhances business for everyone. Through appropriate training, employees are able to maximize the use of our equipment."

Since Tony started this program, several different courses have been offered. These sessions which include slide presentations, lectures and discussions are held with instructors supplied by the various vendors.

Metal Fabrication manufactures prototypes and numerous machine castings for many Data General products and has already benefitted from this program. An improved plating process is now in place as a result of these classes.

The employees who attend the seminars have an opportunity to speak with the suppliers directly, regarding proper use of the equipment and tooling they are using. Tony feels the training is an enjoyable way to learn and is pleased with the results. He adds, "I have gotten a lot of support for the program and it is gratifying that it has been so well received. When employees participate in something like this it helps them understand their jobs better while meeting quality goals."

Metal Fabrication employees learn about proper utilization of tools during a recent seminar held in Southboro.

Fatima Martins Earns U.S. Citizenship

Fatima Martins has achieved a number of goals while contributing to the productivity of Southboro's materials department. Fatima, now a coordinator for the MRB (Material Review Board) is responsible for tracking the flow of returned materials from Incoming Inspection. She came to Southboro more than five years ago as a packer.

Last month Fatima attained something that she has worked toward for a long time. After many months of studying American history and government she became a United States citizen. Don St. Martin, who has been her supervisor over the past three years, helped Fatima prepare for and pass an oral exam. It enabled her to become a citizen during a swearing in ceremony at the Worcester County Court House in March.

Fatima immigrated to America as a child from Sao Miguels in the Azores and currently lives in Shrewsbury. She states, "This is a second milestone for me the first one was earning my high school diploma which I did by attending classes at night."

Fatima explains that working at Data General has helped her realize her goals while developing skills on the job. Along with this she states, "I have had the opportunity to learn how business functions in America. I have made many friends here, too." One of Fatima's sisters, Maria Cordeiro, is also employed in Southboro as a test operator.

In addition to what she has already accomplished, Fatima has plans to continue her education at night. She is hoping to pursue an associate's degree in business.

Don St. Martin adds, "Fatima's progress at work has been very rewarding and I am proud to have been able to assist in earning her citizenship and in her career."

Fatima Martins and Don St. Martin share a moment as they talk about Fatima's recently attained U.S. citizenship.

Focus On Safety

Safety Committee To Install CRTs

The Southboro Safety Committee is installing CRTs in both the Building 4 and 5 cafeterias. The terminals will be utilized for viewing safety information and messages. This will assist employees in keeping their work environment safe. The Safety Committee invites all employees who have suggestions for graphics, quizzes, slogans and games to submit them for review. Send ideas to

Sandy Cooley, MS 5-52A and see your ideas displayed.

Films Support Safety

One of the Safety Committee goals is to schedule enjoyable and informative seminars and films for employees in Southboro.

Jim Cusson, Safety Programming Sub-Committee chairperson is working very energetically to do just that. Jim and several other committee members have visited the Worcester County Safety Council Film Library and the Boston branch of OSHA to select films from each organization's film library.

Last week over 200 employees viewed films pertaining to machine shop and office safety. Even though these are basic topics, they remain a very important part of work life. The films illustrate that by using common sense and courtesy, a safe work environment can be achieved.

Jim states, "The films we presented help employees strengthen their attitudes about safety. We are addressing this issue in a very positive way to motivate employees so they will take an even greater interest in safety."

Milford

People

Doug Fristoe has been promoted to Quality Assurance Engineering manager responsible for coordinating the activities of Vendor Engineering, Product Repair Center In-Process Quality Engineering, Q.A. Customer Service, Packaging Engineering, Warehouse Quality Engineering, Final Reliability Test and Test Audit. He reports to Ed White, Quality Assurance Engineering manager.

Doug, who has been with Data General since 1980, has been a senior industrial engineer for Field Engineering Logistics Manufacturing Engineering in Milford and Systems Integration Operation Industrial Engineering in Southboro. Prior to that, Doug was an industrial engineer for Zayre Distribution Services in Framingham.

Doug has a BS in industrial engineering from the University of Missouri.

Field Engineering Honors "Employees Of The Quarter"

Twenty-nine Field Engineering employees have been recognized as "Employees of the Quarter" for quarter two of fiscal 1983.

The employees were chosen for performance that goes beyond their normal responsibilities and has a noticeable impact on their departments and the division.

Twenty-six Milford employees were recognized at a banquet held this week at the Sheraton-Tara in Framingham. Two employees from Colorado Springs and another from Austin are being honored at local celebrations.

"Employees of the Quarter" from Milford are:

Judy Blodgett	Jonathan Aliber
Nancy Hebert	David Bartlett
Patricia Willame	Philip Beshire
Roger Duval	Wendy Falamino
Bryant Walter	Doug Fristoe
Michele Hartman	Albert Gouveia
Judith Hollenbeck	Timothy Mahan
Nancy Jacobson	Patrick McAdam
Kelly Giustiniani	Alan Nashawaty
John Johnson	Alfred Olsen
Charles Marsden	Michael Williams
Roger Prince	Thomas Kelley
Marianne Holmes	Caroline Prince

From Colorado Springs are: Brenda Edgington, senior computer operator, and Jeffrey Campbell, senior field technician; and from Austin is: George Brown, senior technical writer.

Milford PRIDE Circles Making Contributions

Improved communication and increased efficiency remain constant goals of the PRIDE Circle program at Milford. Three PRIDE Circles recently made significant contributions toward those goals.

The Traffic PRIDE Circle recently met with the members of the Shipping department in order to eliminate any misunderstanding of each group's functions.

Through this discussion between the two groups, many effective suggestions were made and a more thorough understanding of each other's jobs occurred. Circle Leader Judy Sarnosky feels the meeting was successful and says "communication between the departments has opened up a great deal."

The Milford Packers PRIDE Circle recently worked to enhance the scheduling of replenishment shipments to the field.

One of the contributing factors to this problem was overcrowding in the Consolidation area. Through their research, the Packers discovered that the solution would be a change in the way that their orders are scheduled, which would better utilize existing space. Subsequently, Circle Leader Mike Morgan arranged a meeting between area supervisors, and agreement to use the Circle's solution was obtained.

The rescheduling of replenishment shipments has been implemented, resulting in a more efficient consolidation system, which in turn provides the field with replenishments on a timely basis at reduced cost.

The monthly meetings which Product Repair Center Manager Russ Johnson holds with technicians have taken on a new flavor due to the efforts and ingenuity of the Magnetics PRIDE Circle.

Circle members had discussed ways of improving the meetings, and determined that most of the questions the technicians were asking Russ needed advanced preparation to be fully answered.

The Magnetics PRIDE Circle developed and implemented a system to alleviate the problem. They designed and assembled a box to accumulate questions in the weeks before the monthly group meetings. Circle members compile a list of the questions and present it to Russ a week before his meetings.

Circle members talked to Russ about their idea. He is very receptive to it, saying, "I feel that this will be an effective way of improving communications throughout the system and will aid me in getting to the heart of more serious concerns."

The first meeting was held, and Circle members were pleased with the outcome. Says Circle Leader Phil Jodoin, "I look forward to receiving as much input from as many of the technicians as possible, because in that way we will all benefit."

The results of the the three Circles' efforts show that PRIDE Circles are making significant contributions at Milford.

Benefits

Health Watch

Ask Your Mother

Between 1941 and 1971, DES (diethylstilbestrol) was a commonly prescribed synthetic hormone designed to prevent pregnancy problems. It was later discovered that DES could be associated with a variety of medical problems occurring in the children of women who took DES. The known medical problems concern the reproductive organs, childbirth and fertility. Although the risk of cancer in the reproductive system is small, there appears to be a slight increase in the risk of DES-exposed children.

The week of April 18 to April 23 is national DES Awareness Week. Men and women born between 1941 and 1971 should ask their mothers if they took

DES and if so, may want to arrange for special screening exams to spot potential problems. For example, early detection of cancers known to be associated with DES are treatable and curable. In any event, it should be a part of a person's medical history.

Information is available through pamphlets in the Dispensary at each location or from your personal physician or a urologist.

Activities

Spring Race To Include Biathlon

A cycling-running biathlon will be included in the Spring Road Race program scheduled for Friday, May 13 at 5 p.m. The biathlon format includes the normal cycle course of 13-miles and a three-mile run immediately afterward. The biathletes will start the race with all other cyclists, complete the 13-mile bike course and continue on with a three-mile foot race. As in the past, the Data General Spring Road Race offers a 13-mile cycle race and foot races of ten kilometers (6.2 miles) and three miles. Applications will be attached to course maps posted in the cafeterias in Westboro, Southboro and Milford.

The Data General Spring Road Race is sponsored by the Data General Activities Committee.

Good Seats Left

There are still tickets available to The Original Ringling Brothers-Barnum and Bailey Circus at the Centrum on Thursday, April 21 at 8 p.m. Tickets are \$7 per person, children under 2 years old are admitted free. Send ticket requests to: CIRCUS, MS D127. Requests will not be honored without payment. **NOTE:** Make checks payable to the Data General Activities Committee. No refunds or exchanges will be allowed.

Opera New England Returns to Woodstock

The Data General Cultural Center is offering tickets to Opera New England's presentation of Mozart's Comic opera *The Abduction from the Seraglio*. Tickets for the Friday, May 6 (8 p.m.) presentation are \$11 per person. For reservations contact Rita Fristoe, extension 4712 in Westboro.

Softball Fever

ROSTERS Send rosters to Scott Vottiero, MS C137 in Westboro.

ENTRY FEES Send entry fees to Don Wiser, MS B137 (check or money order only). The balance of the fees are due no later than June 10.

POOL IT

Salem/Beverly area, Linda, to DG-Webo, hrs. 8-4:30, flex., x5597.
