Franson Appointed NASD Controller

Art Franson

Art Franson has been named controller for the North American Sales Division (NASD), reporting to Business and Field Division Controller John Gardner.

He is responsible for all the financial planning, analysis and control activities to support North American Sales.

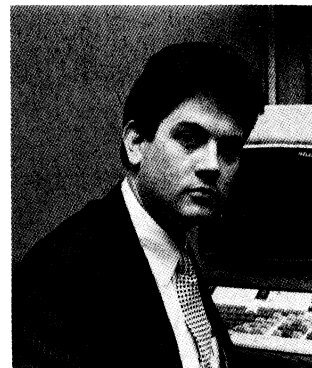

Art comes to Data General from Digital Equipment Corporation. He was most recently group controller for the Personal Computers and Terminal Logistics area; prior to that he was Engineering Systems Product Line controller; Industrial Products Group controller; and controller for the Salem, New Hampshire plant.

Art has a BS in finance from Northeastern University and an MBA from Babson.

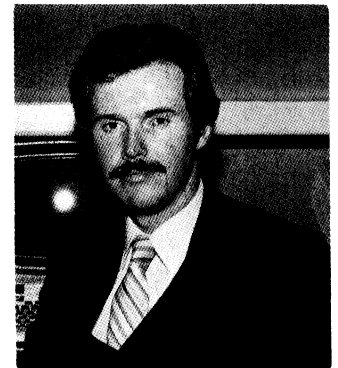

Guide To Corporate Hotel Rates Available

Corporate Travel has prepared a Corporate Rate Hotel Guide listing rates available to Data General business travellers on a worldwide basis. Copies of the directory are available from Corporate Travel, MS D127 in Westboro. The supply of directories is limited so only one request per department will be honored.

First Dealer Marketing Representatives Named For DESKTOP GENERATION

Vincent Schiavo

Michael Cairns

Michael Cairns and *Vincent Schiavo* have been appointed to the new Dealer Marketing organization responsible for recruiting new dealers for the company's DESKTOP GENERATION products and also will serve as retail sales liaison between Data General, its approved dealers and their customer. They report to Richard Brown, director of Dealer Sales.

Michael has been named Area I Dealer Marketing representative for the mid-Atlantic region. He will coordinate a network of Dealer Marketing representatives each serving specific regions, develop special dealer assistance programs and supervise dealer training and administration. Micheal is based in Westboro.

Before joining Data General, Michael was National Sales manager for The Interface Group, a producer of computer industry trade shows. He also has held positions with Burroughs, Victor Computer and Automatic Data Processing. He has a bachelor's degree from Wayne State University.

Vincent has been appointed Dealer Marketing representative for the Washington, D.C. area, based at Data General's office in McLean, Virginia.

Vincent, who holds a BS in computer science from the University of Maryland, was previously sales manager for Zainax Systems Corporation. His retail

computer sales experience includes a position as manager of the Washington, D.C. outlet of the Computer Store.

Corporate Temporary Services Established; Manager Named

A new service to provide temporary secretary, clerical and administrative staffing for Data General's Massachusetts operations has been established at Westboro. Corporate Temporary Services will recruit and train people who will be available to departments when help is needed due to vacations, leaves of absence, illness, or short-term special projects.

Diana Carter is manager of the new operation which reports to Steve Hobbs, manager of Corporate Employment. Diana comes to Data General from Venture Professional Services in Framingham where she was managing director. Before that she was a branch manager for Kelly Services, also out of Framingham.

"Data General contracted for more than 50,000 hours of temporary help in the past year," explains Diana. "Our own temporary help staff will be able to provide better service at a lower cost to the company from people trained at Data General and familiar with Data General practices."

Diana is currently recruiting people from outside the company who will staff the Temporary Services functions on both full- and part-time basis.

In the near future, managers and directors will receive details on the procedures to be followed in requesting "in-house" temporary help.

Westbrook's Quality Improvements Applauded

Continuing quality improvements in mag tapes and disc drives made at Data General-Westbrook recently were applauded by representatives of General Electric's (GE) Medical Systems Division.

GE's Medical Systems Division, based in Milwaukee, Wisconsin, has been using Data General computer systems for seven years as a key element of its CT diagnostic scanners.

A CT, or CAT (computer axial or computer-aided tomography), scanner is a computer-aided device that goes a step beyond the X-ray in helping doctors diagnose illnesses. CT scanners give doctors three-dimensional pictures of bones, muscle and soft body tissue. GE's CT business has grown rapidly since its first system was installed in September 1971.

In a recognition ceremony at Data General's Maine Manufacturing facility, GE representatives unfurled a banner recognizing employees from the Zebra and

Zebra Adapter, and Mag Tape production lines and support departments for their continuing quality improvement efforts. The banner, stating: "Congratulations, Westbrook - You Have the Maine Ingredient - Quality Peripherals," is being hung above the lobby entrance so that it is visible to the entire Production area.

"We've come here today to give you thanks for the work you've put into this product. Thanks for the quality improvements. This product works right the first time," said Dale Renken, GE's CT Product Quality Manager.

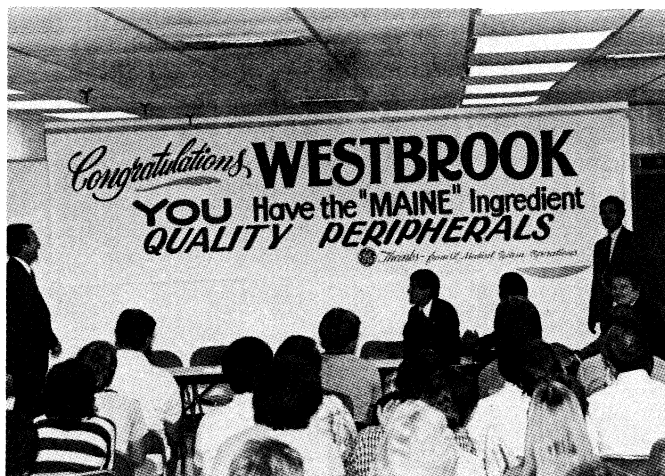

"You've done an outstanding job in terms of making the product better," said Jim Curtiss, GE's CT Manufacturing Operations manager. GE is first in the CT industry, thanks to the efforts of Data General employees building high-quality and highly reliable products, the GE plant manager added.

As part of the recognition ceremony, Westbrook employees told the GE representatives about Data General's quality efforts. "Quality doesn't end with this presentation," said Assembly Group Leader Pat Merritt of Mag Tape. Also speaking were Greg Baker, Zebra group leader/technician, and Victoria Grant, Fab group leader/production painter.

Joe Carlozzi, Westbrook's Quality Assurance manager, says the recognition carries weight in light of GE Medical Systems' rigorous quality standards. GE tests each CT unit for more than 300 hours before shipping it to a customer, and then guarantees continuous uptime. The product cannot fail when a patient is being examined, said Jim Curtiss.

Each GE system installed today contains a Data General ECLIPSE S/140 central processing unit, a 6020 Mag Tape and a 192MB disc drive which process data from the GE data acquisition system (DAS) into images.

Following the presentation, there was an opportunity for employees to enjoy refreshments and to discuss their work with the GE representatives.

GE Medical Systems Division representatives unveil the banner at Westbrook.

GE Medical Systems is pursuing the next step in medical diagnostic technology with nuclear magnetic resonance (NMR) devices. Data General is supplying ECLIPSE MV/4000 central processing units and model 6236 disc drives for GE's NMR machines.

The appreciation of Westbrook's accomplishments is the third time within the past 18 months that GE Medical Systems has recognized the efforts of Data General employees. President Ed de Castro, on behalf of all employees, has accepted an "Award of Appreciation" for the quality of Data General's products used in CT scanners.

Data General-Apex employees have received a banner similar to Westbrook's, heralding Data General's quality and the PRIDE Circle program with the slogan, "Hey!! Apex - Your 'PRIDE' Is Showing - The Quality Performance Of Your Classy Chassis."

Do Your Banking Without Leaving The Building

Data General-Westboro and Southboro employees have grown accustomed to doing their banking without leaving the building. The BayBank X-Press 24 automated teller window, outside the Building 14A cafeteria in Westboro and inside the Building 4 cafeteria in Southboro, allows BayBank card holders to deposit, withdraw or transfer their money with a touch of a finger.

If you are interested in opening a BayBanks account, a representative is available on Thursdays from 11 a.m. - 3 p.m. in the Westboro main cafeteria. Accounts may also be opened at the BayBank office in the Julio's Shopping Center at Lyman St. and Route 9 in Westboro.

BayBank X-Press 24 Offers A Banking Bonus

Employees who open a new BayBanks "Something Better" checking account and enroll in Data General's direct deposit program can receive free checking which requires no minimum balance and eliminates all service charges.

In addition, a BayBanks X-Press 24 card will be issued. This allows you to take advantage of the automated teller windows at Data General-Westboro and Data General-Southboro as well as any of the more than 225 other X-Press 24 machines located throughout Massachusetts.

Cardholders may use the automated teller windows to transfer funds, make deposits, check balances and withdraw cash up to \$350 per day. One feature - "Deposit with Cash Back" - allows you to deposit a check and immediately withdraw up to \$100 without waiting for the check to clear. A BayBank card may also be used to make payments on any BayBank personal, auto or educational loan, mortgage, Reserve Credit, and BayBanks MasterCard or VISA.

Union Warren Offers Saver's Choice

Data General offers a payday savings program called Saver's Choice through the Union Warren Savings Bank. This payroll deduction program allows you to save the amount of money that you want automatically. You decide how much you would like taken from your paycheck each pay period and it will automatically be put in the bank earning 5.5 percent interest.

If you are interested in opening an automatic payroll deduction account notify Ellen Stefanik in Westboro on extension 4570 or write CREDIT UNION, MS D138. Also, a representative from Union Warren is in Westboro *every other* Wednesday from 3:15 p.m. to 4 p.m., in Milford on Wednesdays from 2 - 3 p.m. and in Southboro on Tuesdays from 3 - 4 p.m.

In addition to the automatic payroll deduction program, the Union Warren Savings Bank also offers free checking to employees who directly deposit their paycheck into a NOW checking/savings account, a 1 percent discount on installment loans, and no charge on First National City Bank Traveler's Checks.

Union Warren Savings Banks are located at the Deerskin Plaza on Rt. 9 in Framingham as well as 10 other Massachusetts locations.

Westboro

Arlington Heights Office Relocates

As of October 15, the Arlington Heights office will have relocated to: Data General Corporation, Schaumburg Corporate Center, 1501 Woodfield Road, Schaumburg, Illinois 60195. The new telephone number will be (312) 884-6600.

People

John Blakely has been named senior marketing specialist responsible for the pricing, planning and promotion of Technical Products Division (TPD) graphic products used in the industrial automation market.

John has been with Data General since June, 1978. Most recently he has been a senior marketing

specialist concerned with TPD microproducts and, prior to that, an Engineering project leader.

John has a BS in electrical engineering and a BS in computer science from the University of Utah. He is currently pursuing an MBA at Babson College in Wellesley.

Linda Gouse has joined Data General as a marketing specialist reporting to Dave Rome, manager of Computer-Aided-Engineering/ Computer-Aided-Design/ Computer-Aided-Manufacturing Marketing within TPD. She will support programs for marketing to technical end-user customers.

Linda has a BS in chemistry from Mary Washington College and an MS and a doctorate in chemical engineering from MIT.

Southboro

People

Three employees have recently joined Southboro Manufacturing:

Kevin Brassard is an associate programmer analyst in MIS. He is developing software to support the new Distribution Centers. Kevin is a graduate of Western New England College and holds a BS in computer information systems. He reports to John Wainright, MIS project leader.

Carl Ballard is an associate vendor engineer working in the I.C. (Integrated Circuit) Test area. He works with semi-conductor manufacturers to insure quality of purchased components. Carl also is assisting in testing I.C. programming for new parts and determining qualifications of purchased components for new products. A graduate of Central New England College, Carl has a BS in electrical technology. He reports to Spencer Adams, Vendor Engineering manager of I.C. Test.

Sandra Fung joins Reproduction Distribution Services (RDS) as an associate manufacturing engineer. Sandra reviews and implements packaging schemes for DESKTOP GENERATION software, manuals and related media. She recently earned a BS degree in electrical engineering from Cornell University. Sandra reports to Engineering Manager Carl Johnson.

Take Note:

M.O.D. Request Forms Stop Here First

Any Southboro employee who plans to attend a Management and Organizational Development (M.O.D.) course should forward the course enroll-

ment form to Valerie O'Connell, Training, MS 4-5 in Southboro for approval. Upon approval the form will be forwarded to M.O.D. in Westboro.

These Hours Could Benefit You

Starting Tuesday, October 11 Benefits administrators will be available on a bi-weekly basis to provide employees with information regarding the Savings and Investment, Pension, Medical, Life Insurance, Dental and Disability Programs. Administrators will be available from 2 p.m. - 3 p.m. in the Building 4 Cafeteria and from 3 p.m. - 4 p.m. in the Building 5 Cafeteria.

Alarms To Be Tested

Emergency evacuation alarms will be tested in Southboro on Wednesday, October 12. The alarms will sound during all three shifts. There will be announcements on the paging system prior to each alarm reminding employees that it is only a test and that they should remain at their work areas.

The alarms will sound at the following times: Building 12 -- 9 a.m. and 3:45 p.m.; Building 5 -- 9:30 a.m., 4:15 p.m. and 11:45 p.m.; Buildings 1 through 4 -- 9:15 a.m., 4 p.m. and midnight; and Building 6 -- 9:45 a.m. and 4:30 p.m.

ECLIPSE MV/8000 II Ships Through Team Effort

The first shipment of a new computer system is a very important milestone in the development of a product. When the first new ECLIPSE MV/8000II computers shipped from Southboro Manufacturing recently it represented the way teamwork assures the timely delivery and reliability of a new product.

According to Tom Knapp, Southboro project manager of the ECLIPSE MV/8000II system, the key to the project was the cooperation that existed between all the facilities involved in developing and manufacturing this system. He explains, "More than one year before the product was announced regular meetings were scheduled with representatives from all the organizations within the company who were participating in the product's development."

The Westboro-based Engineering and Design Assurance Engineering (DAE) groups and Southboro, Portsmouth and Westbrook Manufacturing worked together to formulate a comprehensive plan to develop the product including sample builds of the system

and an integrated test plan. Through weekly meetings all issues regarding the system were shared. Manufacturing worked closely with Engineering during the initial build and test activities on the system. Using additional sample units which were built by Manufacturing, DAE and the plants further qualified the product through a variety of acceptance tests. These tests included, diagnostic checks for hardware and software functionality, compatibility with various peripherals as well as numerous environmental tests. Another form of testing measured EMI emissions to assure the ECLIPSE MV/8000II computer would be fully compliant with Federal Communications Commission (FCC) regulations.

Acting New Products Manager Tom Maziarz explains that all the departments involved had the common goal of shipping a highly reliable product, "Through the integrated test plan we worked together. As the sample builds were produced and tested at different levels, various issues regarding quality and performance developed. DAE and the plants had the opportunity to interact continually with Engineering to resolve those issues. This kind of direct communication had a very positive impact on product reliability. Sharing information pertaining to each group's area of responsibility and expertise has resulted in a smooth introduction of this product to Manufacturing."

PRIDE Training Continues As Program Grows

Southboro employees who participated in the eighth Leader Training course are (back row, from left) Earl Milton, Ann Heckman, Jim Brosnan, Barbara Burke, Denise Beauregard, Harvey Levinsky, Kathy Dow, Charles O'Neil, Valerie Hill. Front row (left to right): Josephine Cabral, Sue Nowlan and Donna Christie.

By popular demand, a PRIDE Circle Leader Training course was held recently in Southboro. This course has been given eight times over the last year and close to 100 Southboro employees have benefited from it.

PRIDE Circle Facilitator Joe Crisefulli notes that the course continues to be in demand for several reasons. "Attendees learn all the fundamental techniques necessary to lead a Circle, and they gain something else," says Joe, "problem solving and brainstorming, which are two of the most used PRIDE Circle techniques, can be applied in many aspects of worklife, not just through Circle endeavors." Along with that he observes that people develop greater confidence and leadership skills through the course.

According to Joe the PRIDE Circle program continues to grow. Many Circles are currently researching important issues and developing presentations. He explains, "The PRIDE Circle program is maturing and Circle members see the success of presentations and the improved work environment which can result through Circle efforts. This inspires everyone to work even harder to achieve the objectives of the program."

Ann Heckman was among the 13 employees who attended the most recent training session. She was pleased with the seminar's content. "The things Joe taught during the three-day program go beyond worklife," she states. Ann believes that she now has a greater understanding of people and relationships. "I look at things a little differently now. Work is a community of people and it is important to take a look at how we relate to each other. I am more observant of how I listen and treat others as well as more tuned in to how others relate to me. I am looking forward to forming a Circle."

Sylvia Story Retires

Sylvia Story retired last week after 12 years of service at Data General. Most recently Sylvia was a data entry clerk for Fabrication Operations Industrial Engineering. While discussing her future with Manager Tom Forhan, she explained that she enjoyed her years with the company. Tom says, "I really liked having Sylvia work in the department. We will all miss her but wish her a happy retirement."

Field

People

Area II Field Engineering Manager Named

Lynn Butler has been named manager of Area II Field Engineering, based at Norcross, Georgia. Lynn reports to Bill Bentley, vice president of North American Field Engineering.

Lynn joined Data General in 1979 and has served as a branch, region and Area I manager as well as manager of MIS in Field Engineering headquarters.

Prior to Data General, Lynn was in field engineering at IBM. He has a bachelor's degree in management from Webber State College in Utah and an MBA from the University of California at Berkley.

Bill Barrar has joined the Systems Division in Cambridge as Marketing and Sales manager.

Bill will assist the Sales force in obtaining business for Data General, using the Systems Division's custom application software solutions and products.

Prior to joining the company, Bill was a Marketing manager at Pconcept, Incorporated; Engineering manager at Prime Computer; and an engineer at Honeywell.

Bill has a BS from Tufts University and an MBA from Northeastern University.

Barbara Haglind and **Maureen Rudd** are associate program analysts reporting to Technical Support Manager Kris Hill. They are based in Cambridge.

Barbara is responsible for internal and external support and development of Data General software including enhancements to software and system packages. She has a BS in computer science from Boston University.

Maureen is responsible for software development and support. She is a recent graduate of Merrimack College with a BS in computer science.

Activities

Holiday Shopping In New York; Take In A Show While You're There

A trip to the 'Big Apple' is scheduled for Saturday, December 10. The price is \$37 per person and includes: a day of shopping in the City; a reserve seat for an evening performance at Radio City Music Hall; and roundtrip motorcoach transportation. Reservation will not be held without full payment. Send reservation to: BIG APPLE: MS D127 in Westboro.

Captains Find Your Teams

Employees interested in participating in the 1983-1984 Data General Basketball League are urged to attend an organizational meeting Tuesday, October 11 at 6 p.m. in the Westboro cafeteria. All team captains must turn in their rosters at that time. For further information contact Dave Alexander (X2615) in Milford.

Wallyball Season About To Begin

The Data General Wallyball League will meet Tuesday, October 11 at 5:30 p.m. in the Westboro cafeteria. At that time complete rosters (including names, team captains and managers) should be submitted. For details contact Lynne Story, MS 4-42 in Southboro.

Chess Club Simultaneous

The Data General Chess Club starts its fall evening season on Thursday, November 3 in the Pizzeria with a chess simultaneous. The club's current champion, Stuart Schulman, will challenge the first 20 guests each to a game of chess and play all the games simultaneously. Opponents will be seated in a circle making one move as Stu reaches their board.

A GENERATION AHEAD, YOU WON'T BE A PRISONER OF YOUR IN-BOX.

DATA GENERAL INTEGRATED OFFICE AUTOMATION.

Burying information under a ton of mail at the bottom of your in-box is not the best way to get it when it's critical to a decision.

ELECTRONIC MAIL

With Data General's CEO® Comprehensive Electronic Office, information is delivered electronically. Instantly. Unerringly.

It includes a "certified mail" feature that lets you confirm that it has been seen by the intended party. And an "urgent" signal that flags important messages.

But that's only the beginning.

TOTAL OFFICE AUTOMATION

The CEO system automates just about everything in your office. CEO electronic filing files the way you do. Its electronic calendar keeps tabs on trips, appointments, and meetings—even confirming them all.

Of course, CEO includes easy-to-use word processing. And all this is integrated with data processing for total decision support.

CEO even has an exclusive button that lets you handle typical interruptions, and returns automatically to where you left off.

DON'T DUMP YOUR EXISTING EQUIPMENT

Best of all, instead of having to dump your existing equipment to automate your office, you can build the CEO system around it.

Because it not only ties in with other Data General computers, but it also ties in with the most widely-used mainframe and word processor.

Instead of just a series of personal computers, each CEO workstation becomes part of a global network, with access to data from IBM mainframes.

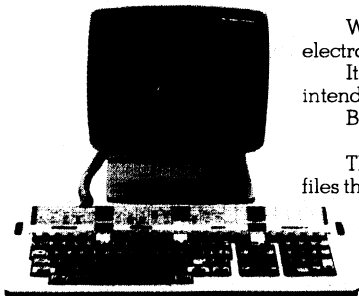

Now that's protecting your investment.

AS LITTLE AS \$5,000 A WORKSTATION

And with the CEO system, the cost per workstation can be as low as \$5,000, depending on application.

CALL NOW

For more information on office automation that's a generation ahead, call: **1-800-554-4343, Operator CE1** or write Data General, M.S. CEO 50, 4400 Computer Drive, Westboro, MA 01580.

 **Data General**
a Generation ahead.
